QUICK SET

bringing materials to life[™]

FOR INTERNAL USE ONLY, DO NOT DISTRIBUTE

USE QUICK SET TO INCREASE YOUR PRODUCTIVITY.

Lafarge offers customers the ability to add Quick Set to improve setting time and get maximum productivity from a crew.

Program

Accelerate the setting time of concrete at any time on your project or structure. With UltraSeries Quick Set, take advantage of highly skilled and large crews by accelerating the setting time of concrete by selecting from 3 levels across 5 strength ranges.

Applications

When the ambient temperature will slow typical setting and push your crew into over-time wage rates, take control by changing the setting characteristics of the concrete. Use in applications such as;

- Residential and Commercial Walls
- Grade Beams and Transfer Beams
- Floor Slabs and Exterior Flatwork with Steel Reinforcement
- Colored Concrete

Benefits

In situations due to cold subgrade or forms and dropping temperatures, Quick Set is one more tool for you to:

- Accelerate concrete even with Sulphate Resistance cements
- Accelerate concrete with steel reinforcement that will be exposed to ground waters or chlorides.
- Control the productivity of your crew and therefore labour costs.
- Ensure concrete is setting when pouring tall vertical structures to reduce form pressure.

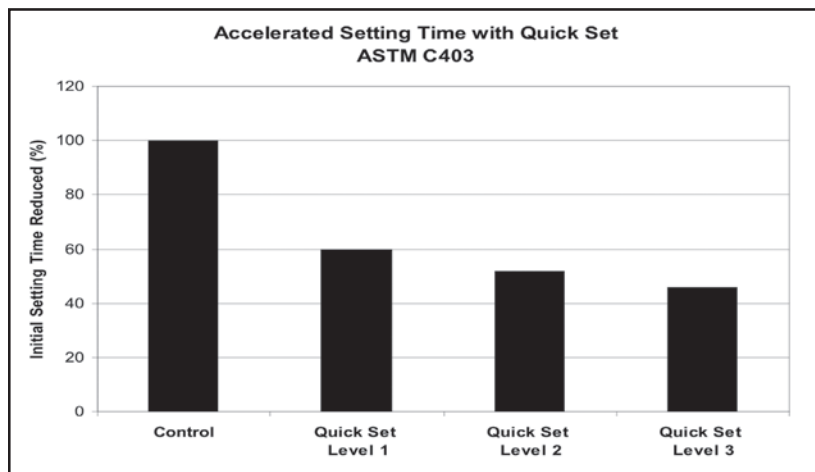

Technical Benefits

UltraSeriesTM Quick Set effectively accelerates the cement hydration process.

- It has no adverse effect on the performance properties of the concrete in place
- It is compatible with sulphate resistant cement.
- It does not introduce chlorides into the concrete.
- It does not affect color concrete.

TAKE ADVANTAGE OF SKILLED AND HIGH CAPACITY CREWS BY SHORTENING SETTING TIME.

As an experienced contractor, you know when the weather and other site conditions are putting you at risk of losing a concrete pour or having to provide external heat. Prepare ahead of time and include Quick Set in your order as a precaution.

The chart above is representative properties of concrete. All test results are subject to certain testing conditions, ambient conditions, raw materials properties and concrete mix designs.

UltraSeries™ Quick Set

PRODUCT GROUP	Quick Set Level 1	Quick Set Level 2	Quick Set Level 3
20 MPA	QS LEVEL 1, CAT 20MPA	QS LEVEL 2, CAT 20MPA	QS LEVEL 3, CAT 20MPA
25 MPA	QS LEVEL 1, CAT 25MPA	QS LEVEL 2, CAT 25MPA	QS LEVEL 3, CAT 25MPA
30 MPA	QS LEVEL 1, CAT 30MPA	QS LEVEL 2, CAT 30MPA	QS LEVEL 3, CAT 30MPA
35 MPA	QS LEVEL 1, CAT 35MPA	QS LEVEL 2, CAT 35MPA	QS LEVEL 3, CAT 35MPA
40 MPA	QS LEVEL 1, CAT 40MPA	QS LEVEL 2, CAT 40MPA	QS LEVEL 3, CAT 40MPA

Test results performance improvements are all under ideal controlled conditions and may not represent actual field result.
